-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

### **DETAILED ACTION**

1. This Office action acknowledges the applicant's Preliminary Amendment submitted 24 December 2003. Claims 1-7 are pending in the application.

#### ***Drawings***

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the plural fall-off prevention pawls of claim 3 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered. The drawings currently show only one.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will

be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

3. Claims 1,2, and 4-7 are rejected under 35 U.S.C. 102(a) as being anticipated by Marsilio et al (US 2002/0170838 A1).

Regarding claim 1, Marsilio et al discloses a disk case 10 with a main body 12, a cover 14, a connection portion 16, a receiving table 70, slit grooves 80, engagement protuberances 62, and outer peripheral edge 42 with notches 50.

As to claim 2, Marsilio et al discloses two slit grooves 80 arranged as claimed.

As to claims 4 and 5, Marsilio et al discloses engagement pawls 100 arranged as claimed.

As to claims 6 and 7, Marsilio et al discloses engagement pawls 100 cut from engagement protuberances 62.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3728

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
  2. Ascertaining the differences between the prior art and the claims at issue.
  3. Resolving the level of ordinary skill in the pertinent art.
  4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
4. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Marsilio et al in view of Flores, Jr. et al (US 2003/0015443 A1; hereinafter Flores).

Marsilio et al, as applied to claim 2 above, discloses the claimed invention except for the fall-off prevention pawls.

Flores discloses fall-off prevention pawls 30 used to secure the disk in the storage area (see paragraphs [0035] and [0036]). It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide the case of Marsilio et al with fall-off prevention pawls as taught by Flores in order to secure the disk in the storage area.

### ***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
